

# Green Building Basics and LEED

Presented by the U.S. Green Building Council

For those new to green building, this instructor-led course offers an introduction to USGBC, green building principles and the fundamentals of the LEED Rating System. It includes topics on climate change and building impacts; motivators for green building; and conventional versus integrative approaches – and the associated benefits – to building design, construction and operations. This is the first step in building your knowledge of USGBC, LEED and green building best practices and is a recommended prerequisite for any 200 or 300-level LEED education program.

## LEARNING OBJECTIVES

After completing this course, you will be able to:

- Describe USGBC and the LEED Rating System
- Consider the value of building green
- Define specific examples of green building practices
- Know where to go for additional resources and support

## WHO SHOULD ATTEND?

Building industry professionals seeking to gain an introductory understanding of the LEED® Rating System and green building strategies, benefits and resources.

- Architects
- Designers
- Consultants
- Facility Managers
- Engineers
- Developers
- Contractors
- Subcontractors
- Owners
- Homeowners
- Manufacturers
- Real Estate Professionals

## LEARNING LEVEL

This is a 100-level course (Basic Awareness).

## CONTINUING EDUCATION CREDITS
